

“Water is essential for life. In developing nations, the search for safe drinking water can be a daily basis. Millions of people die every year, most of them children, from largely preventable diseases caused by a lack of access to clean water and proper sanitation.”

Radianza- eco-friendly fibre in vibrant shades All our shades are green

Radianza is a ready to use gel dyed fibre in vibrant colors with high color fastness and excellent color consistency. Even for 100 MT or more batch quantity—the shade uniformity can be maintained. Radianza is available in more than 90 colors, as fibre (Regular & Shrinkable) Tow & Tops (High bulk & Regular) in a different deniers. This can be blended with all kinds of fibre or can be spun as 100%.

Radianza is an answer to stringent Environmental Norms for dyeing industry. Using Radianza, one can save water, environment and leave the world for the next generation for better living.

For dyeing of 4 MT of fibre/yarn/ fabric water requirement is equivalent to the water to fill up in Olympic size of swimming pool.

Thai Acrylic Fibre has already been successfully supplying Radianza to many countries such as India, Pakistan, Iran, China, Turkey, Europe, Tunisia, Egypt, Nepal and Canada.

Key properties & functions ;

Product : • Color Fastness & Shade Consistency • Low cost
• Higher spinning efficiency • Less wastage in rewinding and knitting

World : • Sustainability • Save Water • Save Environment
• Save World

Operation : Smooth operation at Tow breaker / Spinning machines

Eco-Friendly

Vibrant Shades
